WebGroup: a secure group access control tool for th World-Wide Web

Petitcolas, F.A.P.   Kan Zhang
Comput. Lab., Cambridge Univ., UK ;

This paper appears in: **Enabling Technologies: Infrastructure for Collabo Enterprises, 1998. (WET ICE '98) Proceedings., Seventh IEEE Internat Workshops on**

Abstract:
The **authors** present an integrated secure group access control tool to suppor workgroups on the World-Wide Web. The system enables user **authenticatio** encrypted communication and fine-grained group access control. The tool com **proxies**: one running on the server side and the other one on the client side. the browser sends a query to the client side proxy which contacts the server s for **authentication**, session **key** exchange and checking of access rights. The proxy finally forwards the request to the HTTP server. The tool is completely t to the user and compatible with any Web server and browser. It can also beco a firewall configuration

Index Terms:
